

Calls for Technician at the Centre de Recherche en Myologie, Paris

One technician position is available in the team led by D. Furling at the “Centre de Recherche en Myologie, UMRS974” (GH Pitié-Salpêtrière, Paris) that will be started in October 2019.

The technician will play a central role in the group led by Arnaud Ferry, with tight interactions with other members of the team. Projects are based on the analysis of the effect of therapies including muscular exercise on **muscle physiology**, using murine models of neuromuscular diseases (preclinic studies).

Qualifications. Candidates with expertise in experimental animal physiology and background in molecular biology, biochemistry, and histology applied to skeletal muscle are strongly encouraged to apply. Master diploma is not required. The technician may be at 50% to 100% working time.

Terms and conditions: the salary will be according to the guidelines of the Inserm status, depending on experience. The position will be for 1 year.

How to apply. Please send a cover letter stating your previous research experience and motivation, CV, as a single file to: arnaud.ferry@upmc.fr.
